

KNOWLTON TOWNSHIP SCHOOL DISTRICT

Office of the Superintendent

February 3, 2026

To Whom It May Concern:

I am writing to enthusiastically recommend Healthy Kids as a before and after care partner for your elementary school. As Superintendent of Knowlton Township School District, I have the privilege of working with Healthy Kids since we began our partnership at the beginning of last school. We are in year two of working together.

The decision to collaborate with Healthy Kids has proven to be one of the best choices we have made for our school community. Their program consistently demonstrates exceptional quality of care that gives parents peace of mind and provides children with a safe, engaging, and nurturing environment outside of regular school hours.

What has particularly impressed me about Healthy Kids is their unwavering commitment to several key areas:

Quality of Care: The staff members are professional, caring, and dedicated to creating meaningful experiences for students. They go beyond simple supervision to provide enriching activities that complement our educational mission.

Communication with Families: Healthy Kids has established excellent communication channels with parents and guardians. Families consistently report feeling well informed and connected to their children's before and after care experience.

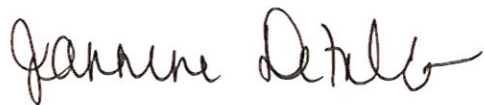

Student Engagement: The programming keeps students actively engaged through age-appropriate activities that promote social-emotional development, creativity, and physical activity.

Our confidence in Healthy Kids extended well beyond the traditional school year. We have also partnered with them to provide a summer program, which proved to be an outstanding success. The quality and consistency of their programming during the summer weeks mirrored the excellence we had experienced during the school year. Most notably, we were so impressed with their ability to deliver high-quality care that we invited a neighboring district to combine with us at one location for the summer program. This collaborative approach not only demonstrated Healthy Kids' capacity to successfully serve a larger and more diverse student population, but also highlighted their flexibility and professionalism in adapting to an expanded operational scope. The seamless integration of students from multiple districts is a testament to their organizational skills and commitment to providing an inclusive, enriching experience for all children.

I recommend Healthy Kids as a childcare partner. They have proven to be reliable, professional, and genuinely committed to the wellbeing of the children they serve. Any school would be fortunate to have them as a partner.

Please feel free to contact me if you have any questions or would like to discuss our experience with Healthy Kids in detail.

Sincerely,
