Greetings from Quinton Township School,

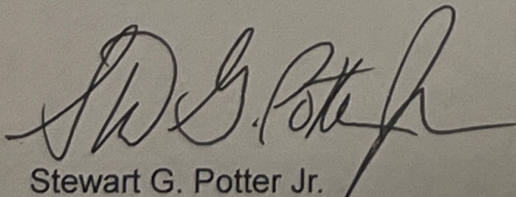

I am writing to share the positive impact that the Healthy Kids program has had on our school community. Since our partnership began, the program's dedicated staff has consistently demonstrated their commitment to enhancing the welfare and development of our students. Regular communication with our school administration ensures that any concerns are promptly addressed, fostering a collaborative environment that benefits all stakeholders involved.

One of the most significant advantages of the Healthy Kids program is their proactive engagement with parents, which helps in maintaining transparency and open lines of communication. Furthermore, the Healthy Kids staff expertly manages all aspects of discipline and finances related to the program, alleviating the administrative burden we previously faced when attempting to run our own initiative during the challenging COVID years.

By signing up with Healthy Kids, we have successfully reduced the involvement required from our administration team, allowing them to dedicate more time to pressing educational priorities. We wholeheartedly endorse the Healthy Kids program and encourage others to consider the transformative benefits it can provide.

Thank you for your attention to this matter.

Sincerely,

Stewart G. Potter Jr.  
Superintendent
