

FOR IMMEDIATE RELEASE

Healthy Kids Programs Named to Inc. Regionals Northeast List for Three Consecutive Years (2024, 2025, 2026)

Sustained growth highlights the organization's commitment to expanding accessible, high-quality childcare, creating regional job opportunities, and strengthening local communities.

FISHKILL, N.Y. — Healthy Kids Programs, a leading provider of school-based childcare, early learning, and enrichment programs, has been recognized by *Inc.* Magazine on its prestigious Inc. Regionals: Northeast list for the third consecutive year (2024, 2025, and 2026).

The annual Inc. Regionals list honors the fastest-growing private companies within the Northeast, recognizing dynamic organizations that drive regional economic vitality, generate local employment, and deliver a lasting positive impact across their service areas.

Healthy Kids Programs' repeated inclusion reflects nearly two decades of mission-driven expansion. What began as a single program in Orange County, New York, has scaled to more than 150 locations nationwide. Throughout this growth, Healthy Kids Programs—also designated as a Certified Benefit Corporation—has remained focused on providing safe, engaging, and affordable before- and after-school programs, Universal Pre-K (UPK), early learning centers, and summer camps.

"Earning a spot on the Inc. Regionals list for three consecutive years is a direct reflection of the trust that school districts, parents, and communities place in us every day," said Steve Dwek, Founder of Healthy Kids Programs. "Our expansion has never been about growth for the sake of numbers. It's about building environments where children feel they belong, families get the flexible support they need, and dedicated educators find inspiring careers."

By embedding programs directly inside local school buildings and community sites, Healthy Kids Programs provides families with familiar, convenient childcare while generating meaningful employment for hundreds of site directors, teachers, and staff members across the region.

As Healthy Kids Programs continues to expand into new school districts and states, the organization maintains its foundational core value: ensuring every child has access to safe spaces, trusted relationships, and supportive environments where they can thrive.

About Healthy Kids Programs

Founded in 2007, Healthy Kids Programs is a Certified Benefit Corporation and leading national provider of school-based childcare, Universal Pre-K, early education, and summer enrichment opportunities. Partnering with school districts across multiple states, Healthy Kids Programs creates safe, supportive, and relationship-focused environments where children build confidence,

social-emotional connections, and a true sense of belonging. To learn more, visit www.healthykidsprograms.com.
